16 mm	400	11 min.	16mm / It Takes 4,000 Ft. = 1 Hour of Video

QUESTIONS AND ANSWERS ...

< How long will it take?

Usually 4 – 6 weeks as an average. Quicker service is available; just let us know your deadline.

< What about blank, black, clear, or dark sections of film?

We will edit out any clear or black footage from your film (as long as it is a foot or more in length). If you have dark film we can lighten it, usually with pleasing results.

< Some of our film is out of focus and we have some sections with very shaky camera-work.

It is our policy to transfer all exposed footage including shaky camera work and out of focus film. We have found that customers still enjoy their films even under these circumstances.

< Will we get our old film back?

Yes.

< My film is very old and has some breaks in it.

When we receive your film, we will repair the film if needed; splicing any breaks. We will let you know if the film is too far gone to transfer.

< How do we organize our film?

It you want, just bring your film in. We can transfer it in random order or if the film is dated, we can transfer it in chronological order. If you like, you may number your reels or boxes.

< Can you put titles on our video?

Yes. Usually before each reel or at the beginning of your tape. We must have the information clearly supplied either on the originals reels, or on a separate document, or email message.

< Can you explain about adding music?

We will add songs to your project; but they need to be supplied on a digital CD. You must own the music. We are just mixing it into the film footage. The cost is \$2.00 per song mixed in, and while we will try to put the songs in the order you request.
